

Sustainability Report 2020

Becoming the world's most sustainable coatings company – Sustainability at Beckers means generating positive impact beyond the surface. Therefore, we have set ourselves ambitious targets in our three streams of doing business: What (Products with impact), We (People with impact), Do (Operations with impact).

Who is Beckers Group?

Beckers Group is a global coatings company that develops high-quality, environmentally competitive paint systems. Our expertise is based on our long history dating back over 150 years. In 2019, more than 1,800 people worked at 24 production sites in 18 countries, providing products and custom-made solutions to customers in over 60 countries around the world.

In 2019, we took our visions, goals, and development strategy to the next level. We are well on track with our "Roadmap to 2030", which is based on three focus areas: products (WHAT), people (WE) and operations (DO).

Message of the CEO

Our purpose is to transform our industry by developing solutions that give surface new meaning and create maximum positive impact for our customers, for society, and for the planet.

Towards 2030

We used 2019 as an opportunity to look to the future – building on what we know to deliver positive impact for our customers, our people and our planet.
